PROFESSIONAL SUMMARY

Flutter developer with 5+ years building and shipping cross-platform mobile apps for international companies. I own products across the full lifecycle — from UI/UX and architecture (Clean Architecture, MVVM) through REST/GraphQL integration, complex payment systems, and App Store / Play Store release. Native iOS (Swift) and Android (Kotlin/Java) knowledge, backend experience with ASP.NET Core and PHP/Laravel, and web work with JavaScript, TypeScript and Next.js. I work well in remote, agile teams and care about performance, maintainability, and clean delivery.

EXPERIENCE

Mobile Application Developer — Rename Soft

January 2026 – Present · Antalya, Turkey · Remote, Contract

- Delivered the Bidmay online auction marketplace single-handedly — owning the full lifecycle from UI/UX design and architecture through development to App Store and Play Store release.
- Architected a complete payment infrastructure with iyzico, Halkbank Virtual POS (VPOS) and EsnekPOS — including 3D Secure (3DS), a WebView-based checkout flow, escrow (held-in-trust) payments, and polling-based payment-status verification.
- Built subscription and credit-package purchases, real-time updates, push notifications, and deep linking over REST APIs.
- Structured the codebase with Clean Architecture and reusable components for long-term maintainability, and managed the full release process on both stores.
- Also built and shipped BiDostO, an anonymous chat-room app with topic-based matching, avatars, and a listener-earnings system.

Mobile Developer (Freelance (1 yr) → Full-Time) — Tutus Media GmbH

August 2023 – September 2026 · 3 yrs 2 mos · Obertshausen, Germany · Remote

- Built and shipped the Flutter apps for Morgenmarkt, a German online-supermarket delivery service, on both iOS and Android.
- Integrated checkout and payments with Stripe, PayPal and Klarna, alongside RESTful API integrations and responsive, localized UI.
- Owned store releases and post-release maintenance across the App Store and Google Play, ensuring compliance and stability.
- Optimized app performance and delivered features on schedule within an agile, cross-functional remote team.

Flutter Developer — Sambapos Software

January 2022 – July 2024 · 2 yrs 7 mos · Istanbul, Turkey · Remote

- Built Jetrik, a restaurant automation platform for the US and international markets — a multi-country, multi-language system spanning the full flow from the order-taking app to the admin dashboard.
- Turned Figma designs into production Flutter UI and integrated REST APIs, Apple Pay and Google Pay.
- Implemented multi-language localization (i18n) and managed application state with Riverpod and Provider.
- Set up Firebase Analytics and Performance monitoring, and handled error analysis and testing to keep releases stable.

Junior Software Developer — AE Code Technology

February 2021 – January 2022 · 1 yr · Konya, Turkey · On-site

- Developed cross-platform mobile apps in Flutter and web APIs in ASP.NET Core, backed by Firebase and SQLite.
- Shipped three production applications end-to-end: Estetik Vitriini, Genc Takim, and Envoy Sofor.
- Built responsive UIs from Figma designs and integrated RESTful APIs, gaining full-stack exposure early in my career.

TECHNICAL SKILLS

Mobile & Architecture: Flutter, Dart, Swift (iOS), Kotlin/Java (Android), Clean Architecture, MVVM, SOLID, Dependency Injection

State Management: BLoC/Cubit, Riverpod, Provider, GetX

UI/UX & Localization: Responsive & Adaptive UI, Custom Widgets, Animations, Figma-to-Flutter, Multi-language (i18n/l10n), RTL, Platform/Method Channels

APIs & Realtime: REST, GraphQL, WebSockets, Push Notifications (FCM), Deep Linking

Payments & Monetization: In-app purchases & subscriptions (RevenueCat), Stripe, PayPal, Klarna, iyzico, EsnekPOS, Halkbank VPOS, Apple Pay, Google Pay, 3D Secure, Escrow

Backend & Data: ASP.NET Core, PHP/Laravel, Firebase (Firestore, Auth, Functions, Storage, Crashlytics, Analytics), SQLite, Hive, MS SQL, MySQL

Web: JavaScript, TypeScript, Next.js

Testing & DevOps: Unit, Widget & Integration Testing, Git, CI/CD (GitHub Actions, Fastlane, Codemagic), App Store Connect, Play Console, Agile/Scrum

PROJECTS

Full details, screenshots and links at hicretay.github.io

Morgenmarkt — German online-supermarket delivery — Stripe, PayPal & Klarna checkout

Morgenmarkt B2B — B2B ordering for market staff — catalog management & barcode scanning

Bidmay — Online auction marketplace — 3D Secure payments & escrow, built end-to-end

Jetrik — Restaurant automation (Flutter Web) — order app to admin dashboard

Poteysa — Request-gathering & quotation platform for property, vehicles & machinery

Acar Company — Workforce shift management & tracking for agriculture

BiDostO — Anonymous chat rooms — topic matching, avatars & listener earnings

Gimbal — ADHD self-assessment — executive-function tests & a focus timer

Estetik Vitriini — Beauty salon directory — campaigns, favorites & appointment booking

Envoy — Fuel logistics driver app — dispatch, delivery notes & document upload

Genc Takim — Pick-up sports matches — claim your position, backed by an ASP.NET Core API

Arcair — Indoor air-quality monitoring — live CO & humidity from IoT sensors

What Am I? — Riddle guessing game — tilt the phone to answer (open source)

Positive Vibes — Daily affirmations & motivation app

EDUCATION & LANGUAGES

B.Sc. Computer Engineering — Selcuk University, 2019–2022 (GPA 3.5/4.0)

Languages: Turkish (Native), English (Professional), German (Basic)
